Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	- Explore PocketSmart AI and open the planner. - Sign in/register if needed. - Choose Home, Party or Jewelry planning.	- Enter budget and planning details. - Submit the request to generate a plan. - Provide outfit image/details for jewelry when needed.	- Review budget allocation and recommendations. - Compare suggested products and platforms. - Use links/history to support purchase planning.
Touchpoint <i>What part of the service do they interact with?</i>	- Home page / dashboard - Planner selection - Login & registration	- Budget and preference forms - Gemini AI planner - Validation / fallback response	- Recommendation cards - Amazon / Flipkart / IKEA-style links - History and saved recommendations
Customer Thought <i>What is the customer thinking?</i>	- Which planner fits my need? - Can I stay within my budget? - Is my information safe?	- Will the plan match my preferences? - Are the recommendations relevant? - Can I trust the estimated prices?	- Which option should I consider? - I should verify price before buying. - Can I revisit this plan later?
Customer Feeling <i>What is the customer feeling?</i>	- Curious and hopeful - Slightly cautious - Motivated to plan	- Engaged - Reassured by structured budget - Interested in recommendations	- More confident - Satisfied with organized options - Cautious about price/availability verification

Process Ownership <i>Who is in the lead on this?</i>	Customer / end user Frontend / planner UI Authentication service	User input FastAPI backend Gemini AI / fallback logic	Backend + catalog Recommendation service User history / session
Opportunities <i>How can we improve this stage?</i>	• Simplify onboarding and planner selection. • Add clear examples for inputs. • Explain privacy/authentication clearly.	• Show budget validation and plan progress. • Make AI output easier to compare. • Clearly label example vs verified pricing.	• Add stronger filters and sorting. • Highlight price-verification reminders. • Make history and repeat planning easier.
