

No. of Functional Features Included in the Solution

Date	30 September 2026
Team ID	6aba2e98ca93a2750963fe65
Project Name	PocketSmart AI
Maximum Marks	5 Marks

Functional Features Overview:

This document lists the functional features included in the PocketSmart AI project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status	Contribution
1	User Registration	Allows users to create an account using name, email and password.	Authentication	Done	User account creation and access
2	User Login / Logout	Provides secure login, logout and session handling for registered users.	Authentication	Done	User access control
3	Home Budget Planner	Generates a budget plan for rooms, quantities, style, location and total budget.	Home Planner	Done	Budget allocation and recommendations
4	Party Budget Planner	Creates a party plan based on budget, guests, event type, venue, theme and location.	Party Planner	Done	Event budget planning
5	Jewelry Recommendation	Suggests jewelry based on budget, occasion, style, outfit colour/description and optional image.	Jewelry Planner	Done	Personalized recommendations
6	AI Recommendation Engine	Uses Gemini AI to generate structured budget plans and recommendations, with fallback logic.	AI / LLM	Done	AI-powered planning
7	Recommendation History	Stores and retrieves previous recommendations for logged-in users.	Database / Storage	Done	History and continuity
8	Product Catalog & Links	Provides catalog recommendations with category, price, rating, discount, platform and shopping links.	Catalog / Integration	Done	Product discovery

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	8
Additional / Nice-to-Have Features	0
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category / Example Features
1	User Interface (UI)	Planner pages, login, registration, dashboard and navigation
2	Backend / Logic	Budget allocation, fallback planning, validation and recommendation logic
3	Database / Storage	Users and recommendation history stored through database operations
4	API / Integration	FastAPI endpoints, catalog links and Gemini AI integration
5	Security / Authentication	Password hashing, sessions, bearer token support and authenticated history
