

Project Executable Files

Date	30 September 2026
Team ID	6aba2e98ca93a2750963fe65
Project Name	PocketSmart AI - Your Smart Budget & Recommendation Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	N/A
7	APK / Executable binary (if applicable)	N/A
8	Dockerfile / Containerization config (if applicable)	N/A
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	No

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
PocketSmartAI/
|-- app/
|   |-- main.py
|   |-- config.py
|   |-- db.py
|   |-- security.py
|   |-- models.py
|   |-- dependencies.py
|   |-- routes/
|   |   |-- auth.py
|   |   |-- pages.py
|   |   |-- api.py
|   |-- services/
|   |   |-- auth.py
|   |   |-- catalog.py
|   |   |-- fallback.py
|   |   |-- gemini_utils.py
|   |-- models/schemas.py
|   |-- templates/ (home, login, register, dashboard, planners)
|   |-- static/style.css
|-- requirements.txt
|-- README.md
-- env.example
```

Step 3: Deployment / Access Details

Field	Not deployed - local FastAPI application
Hosted / Deployed URL	
Login Credentials (Demo)	Create account from Register page; no fixed demo credentials provided
Platform / Hosting Provider	Local development - VS Code / Uvicorn
Repository Link	Not provided
Demo Video Link	Not provided

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:
 Python 3.10+ and a modern web browser. Install dependencies from requirements.txt.

Step 1: Open the PocketSmartAI project folder in VS Code.

Step 2: Create and activate a Python virtual environment.

Step 3: Install dependencies: `pip install -r requirements.txt`

Step 4: Configure the Gemini API key in the environment/configuration.

Step 5: Start: `uvicorn app.main:app --reload`

Step 6: Open `http://127.0.0.1:8000` in a browser.

Step 7: Register/Login and test Home, Party, and Jewelry planners.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Gemini API key may be missing or invalid	Configure a valid API key; fallback recommendations are available.
2	Live product prices/stock are not verified	Treat catalog values as example recommendations and verify before purchase.
3	Application is currently local, not hosted	Run with Uvicorn on the evaluator machine.
